2. Copy the update files to the root directory of your formatted USB stick.
3. Connect the USB stick to your Radical device.
4. Go to the APPS -> Settings -> Auto Settings -> System update -> USB.

Please note: If you select the "Wipe data and format flash" option, all user-installed applications (Easy Connection, Torque, GPS Test plus, Radical GPS etc.) will be deleted. These apps need to be re-installed, after the Software update has completed.

5. The software update installs sequentially. This should take about 2 ~ 3 minutes.

6. The Radical device restarts automatically once after the first part of the update installation has completed.
7. After the device has re-started, the device must be restarted again for the final installation of the applications.
8. Remove the USB stick.
9. Perform a version control.

Version control:

After installing the software update, a version check needs to be done. If the version differs, the entire update must be re-installed again.

Querying the device software:

To query the software main version, go to the devices APPS -> Settings -> About the device.
